Uzone Construction

See the roof raised in under 90 minutes!

With all of the combined unique features, this roof is the most fitter friendly system you can install. In fact, with fewer parts to carry up and down ladders, many installations can be undertaken by one person.

1. Fasten eaves beam to frame

2. Getting the 'A' frame into place

3. Ridge beam slots onto wall hanger

4. Glazing bars just click into place

5. Glazing up

6. Internal cladding provides the perfect finish

- Packaged in 6 installation sequenced and numbered boxes, making fitting easier and quicker.
- Requires virtually no silicone, making a smooth, hassle-free installation.
- An adjustable ridge hanger allows for tolerances you may find on-site.
- Each aluminium ridge comes complete with integral spirit level!
